See Level Design

Last Updated Sunday, 30 March 2008

SEE LEVEL DESIGN is a company of designer/artist/craft workers, with wide experience in the production of handmade exterior and interior furniture, installations and public contracts.

Currently commissioned by Auchencairn Initiative to design and install the play equipment and landscaping in the new Boredom Buster Play Park.

Our work divides into three areas:
- Exterior and interior design and make commissions.

- Execution of exterior fabrication projects for other designers.

- See Level product range of exterior seating.

Most production is in-house using timber and steel. Wider capacity is gained through the use of outworker companies specialising in, for example, CNC cutting, stone carving or engineering.

We are small, flexible, responsive and thriving in our 23rd year of business.

See Level Design endeavours to follow environmentally sound practices in timber procurement. Where possible local timber is used and is actively replanted. Tropical timbers, apart from veneer, are supplied from ethically managed sources with Chain Of Custody accreditation.

Prices on application.
